

Ready to bring emerging talent onto your team?

Climate Corps is a bridge-to-career fellowship program of Strategic Energy Innovations (SEI) that adds **cost-effective, mission driven, and easily deployed staff capacity** to municipalities, private industry, nonprofits, and academic institutions while helping emerging professionals gain a foothold in the climate sector.

We Provide our Partners:

- Recruiting, Hiring, & Employer of Record (Compensation, Benefits, other associated costs)
- Fellow Training & Supervision
- Project Scoping & Implementation Consulting

We Provide our Fellows:

- Monthly Trainings & Peer Cohort
- College Credit & Climate Protection Certificate
- Networking & Professional Development Opportunities
- Substantive Role with Meaningful Outcomes

Our Fellows Can Support:

- Marketing and Outreach
- Research and Planning
- Program or Campaign Launch and Implementation
- Engineering and Technical Support
- Data Management
- Employee Education and Program Engagement

“For SunPower, we have a rigorous, timely process for hires and Climate Corps makes it easy for us. As we continued to work with Climate Corps, we realized that they can find really qualified candidates in many different areas from marketing to finance to engineering and project management.”

– Renee Solari, SunPower, Climate Corps partner since 2014

Fellowship Options: Half Cycle (5 months), Full Cycle (10 months), & Extended Cycle (12 months)

Apply to be a Partner

Applying to host a Fellow is a simple process. To start, get in touch with Climate Corps staff who will work with you to match your staffing needs appropriately.
